

# Innovation Collaborative

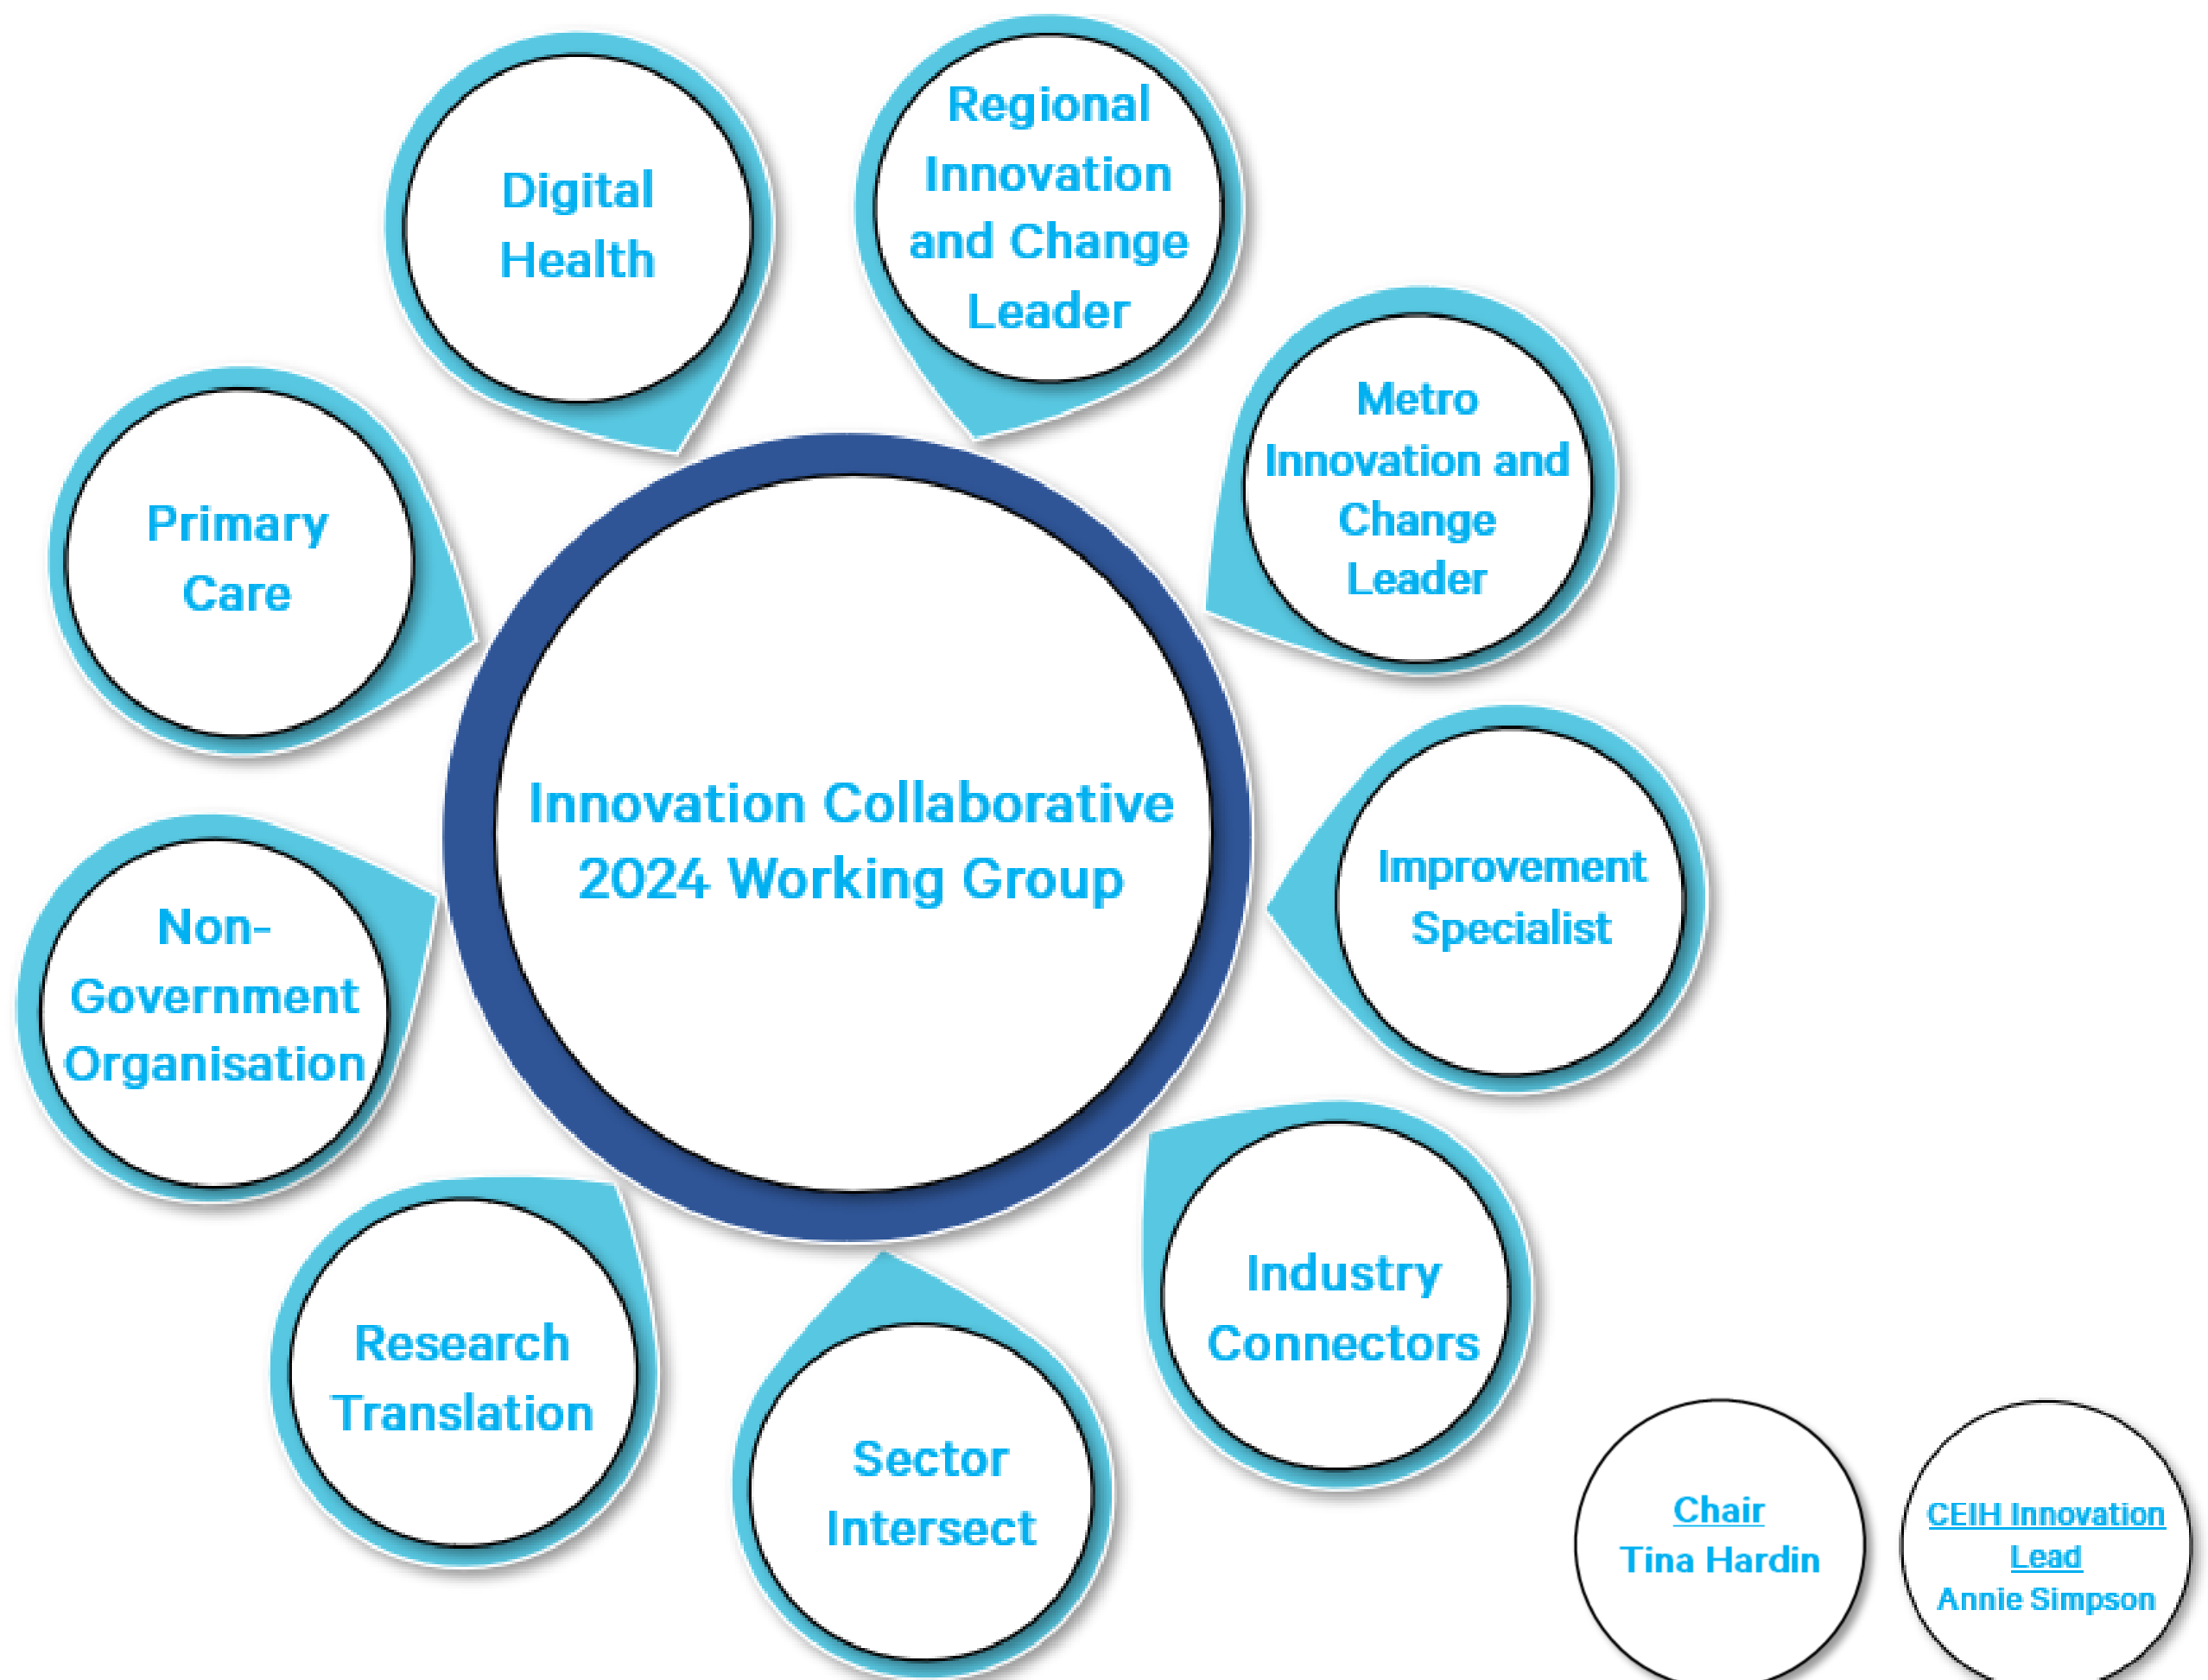

## 2024 Objectives

### Provide the architecture for a state-wide innovation ecosystem

To produce a public health navigational resource that streamlines and simplifies innovation across the health system.

To deliver quarterly events focusing on critical components of innovation that provide insights for professional and resource development.

To convene bi-monthly working group meetings that prioritise and mobilise actions that progress innovation across the health system.

The Innovation Collaborative Working Group is comprised of decision makers and influencers from the health system who provide cross-sector representation and perspectives.
