Care for young people.

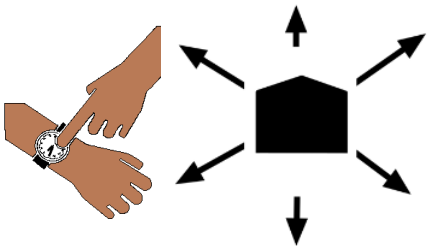

We call this the

Transition Care Clinical Network.

We want young people to get the right health care. Like you see a doctor. They are the right doctor for you.

And

You see them

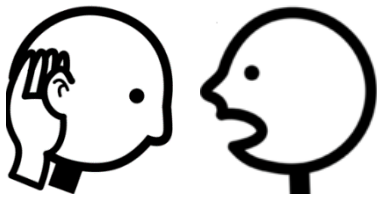

- when you need to
- where you need to.

We listen to what young people want.

We work with you

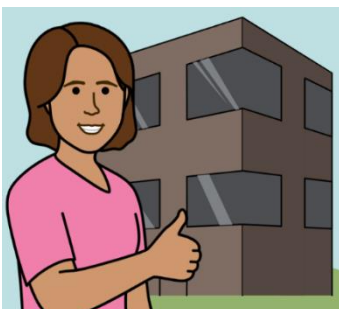

You tell us what you think.

Like

- what we can do better
- how we can do better.

You have help to

- find the right service
- get the right help.

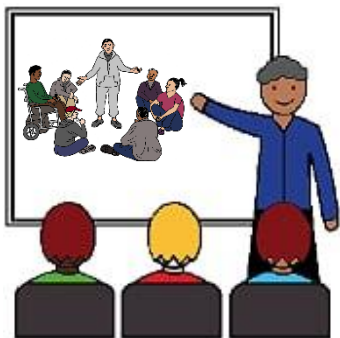

Is it better? How do we know?

It is easy for young people to

- talk to a person you need
- work out what you need
- get the help you need
- have services work together.

Our staff must know how to work with you.

Health staff will learn more.

It will help them to work with young people.

Staff will

- think about what your needs are
- know what help you have now
- think about what more you need
- help you get what you need.

You need to see a different person.

Like you worry about your weight.

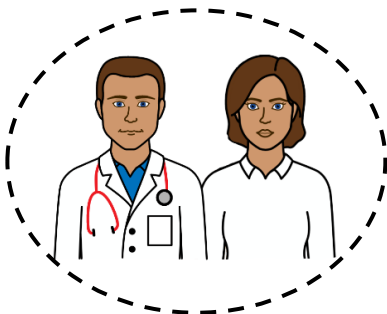

You need to see a dietician.

Your health services can help you.

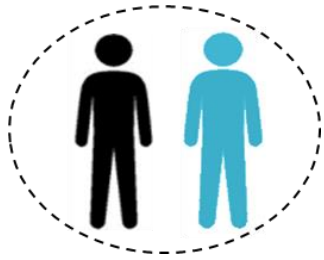

Your service helps you

- get the right new service for you
- know how to use the new service.

Services will know how to work together.

Like your doctor works with your dietitian.

Every one works together.

Then

You get the best health care for you.
